

Skills4Stem Apprenticeship Overview From September 2020

Who are we....?

Skills4Stem Ltd. is a Global Training Provider with a focus on providing international technical qualifications in Construction, Engineering and Project Management.

Skills4Stem is open throughout the year January to December providing both daytime, evening and weekend programmes face-2-face and online. We enrol new candidates EVERY month providing everyone with an individual personalised learning plan.

The Skills4Stem mission is to provide relevant, up-to-date STEM skills for the present and future global workforce.

Skills4Stem is an industry focused qualifications provider specialising in providing BTEC, HNC and HND qualifications in our niche areas of Construction, Engineering and Project Management with progression routes into professional Chartership.

Skills4Stem has offices in the UK (Skills4Stem Ltd.) and the Republic of Ireland (Skills4Stem Ireland Ltd.). We predominantly work in the UK, Europe, and the UAE.

We are an approved provider for the following Awarding Bodies:

Apprenticeship Delivery Methodology:

At Skills4Stem we believe that great learning environments do not just exist in the classroom! Great learning opportunities happen in the workplace, onsite, during project visits and via online learning immersive materials plus much more.

We deliver our Apprenticeships as blended learning programmes which include the following:

- Monthly taught classroom sessions
- Monthly assessment workshops
- Interactive online materials,
- Group & 1-2-1 Competency visits on site
- 1-2-1 Coaching & Monthly Action Planning
- EPA coaching & preparation including mock exams and interviews
- Industry Masterclasses
- Site Visits

We can tailor existing training content or create bespoke materials. We can also provide support to map sessions into an existing employer competency framework.

Why Skills4Stem is different.....?

1. Our trainers are current or ex industry practitioners and ambassadors with in-depth 'real life' working knowledge of the environment(s) your teams work in and understand the challenges the real world provides.
2. Our course designers understand the value of tailoring our programmes for our employers, using language, processes, and priority areas relevant to each employer and their team(s). We focus on providing relevant, current, employment led technical training content that provides immediate benefit to the employer and the industry.
3. We tailor our delivery methodology to each group, (Where any employer has 6 or more candidates, delivery can be completely tailored to the group and their work pattern), meeting the 20% ESFA apprenticeship minimum 'off the job' training as a blended programme.
4. We know some candidates need more help than others, so we schedule regular 1-2-1 mentoring and assessment sessions for each candidate throughout their programme. We work with each employer to pick up any additional needs the candidates may have, early enough to provide additional support where required.
5. We deliver throughout England and for groups of 6 or more we can deliver on your premises or chosen location(s).

Some of Our Clients:
